

Automotive

Automotive Tubing

- High-precision, thin-walled tubing for automotive vents, valves, and fuel transfer systems
- High-pressure hoses for pneumatic lines
- Resistant to high temperatures and chemically inert

Seals, Valves, and Seats

- Precision machined components with industry leading levels of tolerance
- Superior wear properties to allow for high RPM applications
- Specialised grade selection to suit every automotive application

Automotive Vents (ePTFE)

- Specialised ePTFE vents for moisture control
- ePTFE membranes for separation of liquids and gases

Wear Strips and Bands

- High-wear resistant piston bands and strips
- Industry leading levels of tolerance on thickness
- Custom grades to allow for fine tuning of coefficients of friction, PV factor, and wear resistance
