

Fluid Handling Systems

PTFE/Teflon Tubing

- High-precision, thin and thick-walled tubing
- Ideal for high temperature fluid transfer
- High burst pressures
- Resistant to corrosive chemicals

ePTFE Joint Sealant

- Reliable mechanical performance in challenging environments
- Meets AMS 3255A standards
- Superior compressibility and recovery allows improved sealing of gaps
- Operates across a variety of pressure and temperature conditions

ePTFE Membranes

- Allows passage of gases but not liquids
- Ideal for micro-filtration in chemically corrosive environments
- Variety of pore sizes offered

PTFE Bellows

- Capable of high-pressure fluid transfer
- Endures over 2 million cycles
- Best-in-class dimensional tolerance

ePTFE Cut Gaskets

- Effective for all kinds of flange connections and rims
- Customised as per client requirements
