

## Railways

### Sliding Bearings

- Ideal for railway bogeys and rail support systems
- Made as per RDSO specifications
- Designed to suit specific client requirement

### Wear Strips and Bands

- High-wear resistant bands and strips for braking applications
- Industry leading levels of tolerance on thickness
- Custom grades to allow for fine tuning of coefficients of friction, PV factor, and wear resistance

### PTFE/Teflon Tubing

- High-precision, thin and thick-walled tubing
- Specialised Neutral Section assemblies as per RDSO specifications
- High dielectric strength and breakdown voltage for insulation of overhead lines
- Specialised pneumatic tubes for pantographs

### ePTFE Joint Sealant

- Efficient sealing tape for flange connections and container rims
- Resistant to corrosive chemicals and high temperatures
- Superior compressibility and recovery allows efficient sealing of gaps
